

Dragoon Patroller

Dragoon Patroller 4x4 , vehicle satisfies police and emergency response force requirements for armored, highly mobile, multi mission vehicle platform. The APC version of the can accomodate 12 personnel.

The Patroller offers a wide range of mission modules which can be easily mounted while in the field operations. This unique design capability allows the vehicle to be custom configured and serve in a variety of duties including Police, SWAT, rescue, ambulance, emergency recovery/salvage, patrol personnel carrier, drug interdiction, bomb disposal, surveillance and personnell safety control.

Patroller can be also equipped with water tanks, auxilary engine and pump unit coupled with a water cannon, surveillance cameras and extendible barricade remover to be used as Riot Control Vehicle.

A monocoque high hardness armor hull with spaced armored provides personnel protection against 7.62 mm AP ammunition. All vision blocks offer the same level of protection as the hull. The vehicle ground clearance augmented by extra large tires ensures the crew is protected from under body blast effects.

High vehicle power to weight ratio, locking differentials, central tire inflation, and on-the-fly all wheel drive shift enables the Patroller to rapidly respond to crises in all weather and all terrain conditions including amphibious operations without special vehicle preparations.

Patroller can also be equipped with one man turret system incorporated two guns, most commen configurations are 40mm Granade Launcher with co-ax 7,62 mm MG or 12,7 mm MG with co-ax 7,62mm MG with M36 Day/Night sight or Thermal sight.

With its 12 ton GVW, The Drogoon Patroller features an integrated powerpack which allows for rapid field change out. The vehicle ia available in numerous custom configurations with many option features to meet all your current and future Police, Security and Rescue mission requirements.
